SashLine

A warm welcome..

to our wooden windows and doors

Because we manufacture a stunning range of timber windows and doors in our own factory, install them with our FENSA regulated team, and guarantee them for years, you can be confident that you have arrived at the right place.

So, no matter whether you're a homeowner in need of a single bifold door or bespoke window to meet conservation regulations, or you're a developer looking for a reliable supplier and installer for your next project, SashLine are the timber window and door experts for you.

S a s h L i n e

Our story

SashLine is a family business, dedicated to the quality of our workmanship and the care of our customers.

Over the years we have produced and installed thousands of windows and doors for our customers. They will have seen the perfectly finished wooden units, appreciated the many guarantees that come with them and recognised the efficiency of our FENSA regulated installation team. But, they may not have known why we are so committed to the quality of our windows and doors.

SashLine is the product of two generations of carpenters, with craft skills and respect for wood being passed down from father to sons. Founders Mihai and Vasile grew up surrounded by woodwork as they followed their father Ion around his workshop where he fashioned local oak into all manner of things for the people of the villages that surrounded them. Their father taught them his craft and instilled in them a commitment to care and quality that stays with them to this day.

Many years on, Mihai and Vasile have built a business founded on this commitment. They have taken over a factory to ensure that they are not only able to manage the meticulous quality of the manufacturing process, and the sustainably sourced woods they use, but also to ensure that when they promise to deliver on a specific date, the delivery will arrive on that date without fail.

Make it yours..

with the beauty of wood

SashLine windows and doors are manufactured under strict quality control guidelines in our own factory, so while you have numerous options – in woods, colours, ironmongery and glazing – to choose from, you can be assured of the durability, quality and functionality of every one of our units.

If you have not used SashLine before, take peace of mind from the guarantees that we offer. Ranging from 3 to 15 years and covering almost every aspect of every unit sold, you can be assured that when we say we offer excellence in product and service, we deliver on that promise.

Finally, with an in-house team of FENSA regulated fitters on hand we can install anything from a single unit for a homeowner to all the windows and doors on a developer's site.

Our Timber windows

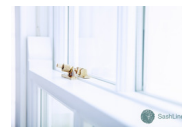

SashLine is a family business, dedicated to the quality of our workmanship and the care of our customers.

Over the years we have produced and installed thousands of windows and doors for our customers. They will have seen the perfectly finished wooden units, appreciated the many guarantees that come with them and recognised the efficiency of our FENSA regulated installation team. But, they may not have known why we are so committed to the quality of our windows and doors.

Traditional Sliding Box Sash

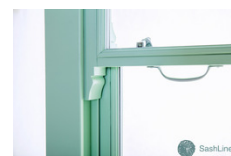

We produce traditional box sash windows to any dimensions in Victorian, Edwardian, Georgian and contemporary styles – to perfectly match the look and feel of your existing windows (including in conservation areas and on listed buildings), or to add a touch of class to your new development.

Because we manufacture and finish all our sash windows ourselves we are in complete control of the supply chain so you can be assured that the delivery date we state is the delivery date we deliver on, every time.

Spiral Balance Sliding Sash

Spiral Balance Sash windows are a modern version of the traditional weight and pulley range. A Sash balance mechanism (spring balance) is a spring-loaded device used to counter-balance a Sash in a box sash window. Sash balances eliminate the need for weight pockets and can be installed in smaller openings and allow for larger window sizes and consequently a larger glass area.

Casement Windows

Casement windows may be the standard modern window system today, but SashLine's window units are far from 'standard'.

The quality and timely delivery of our casement windows is assured due to our control of the entire supply chain, from our factory where the windows are manufactured and finished under strict quality control guidelines, to delivery on-site and installation by our professional FENSA regulated team

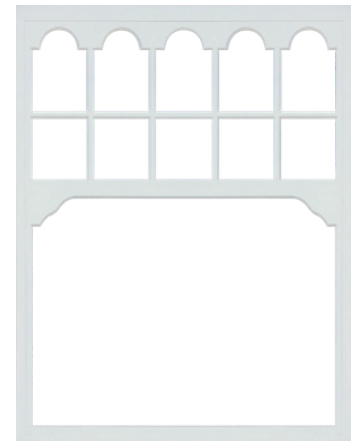

We manufacture and install bespoke casement windows to any dimensions in any of five woods, decorated to any RAL code colour or stained to perfection to bring out the true beauty of the natural wood.

Timber Feature Windows

If you are looking for windows that stand out, that add architectural flair or personality to your property, then you have come to the right place.

Our feature windows come in any shape or size you wish, they can be manufactured in a number of wood options as listed in our Customising Options below, and they can be finished to suit your design preferences – painted in four coats under factory conditions or expertly stained to bring out the natural beauty of the woods used.

Timber Conservation Windows

At SashLine we recognise the importance of aesthetic authenticity, so we offer a service where any original window can be meticulously replicated for homeowners or contractors. We can help you obtain planning permission to install our timber conservation windows, so they can improve the energy efficiency of your home while retaining the traditional elegant look of your property.

Customising Options

At SashLine we give every customer the option to customise their windows and doors to suit their needs, style and budget.

If you're looking for something affordable, luxurious or elegant we can supply it – if you'd like your windows and doors designed to blend in or to stand out we can make them bespoke for you. And, if you're looking for units that are functional for durability, weather resistance and thermal insulation, then we can supply them.

Here are the ways in which you can customise your windows and doors with SashLine:

Glazing

All of our windows and doors are produced with double-glazed laminated safety and security glass as standard to meet even the strictest of thermal requirements. However, should you prefer a customised option here are a few that we can offer on request:

- Triple glazing
- Single glazing
- Acoustic glass
- Frosted/obscured glass
- Glazing bar structure

Woods

As a responsible company committed to ecological standards, all SashLine windows and doors are manufactured in our own factory using only FSC certified timbers from sustainable forests. You can select the wood of your choice from:

Nordic Pine
European Oak
Meranti Hardwood
Accoya Wood
Mahogany

Ironmongery

SashLine includes satin chrome finished ironmongery as standard, though on request you may customise to:

Brass finish
Polished chrome finish
Or others available in Instant Quote area on our website - sashline.co.uk

Standard ironmongery included:

- Sash windows – Brighton Fastener, Lifts, Pulls and Radius pulleys.
- Casement windows – Casement Stay, Casement Fastener, Mortice, Hook Plates and Stay Pins.
- Doors – Hinges, Multi-point Locks, Mortice (not on sliding patio doors) and Handles (plus Pin Bolts on bifold and French doors)

Paint and Wood Stain Finishes

All windows and doors, as standard, are finished in microporous white paint, applied in four even coats under quality-controlled factory conditions to ensure both the perfect finish and long-lasting guaranteed weather-resistant results.

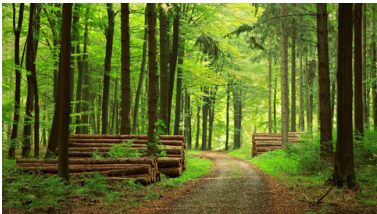

Or, provide us with the RAL code for the colour you wish us to finish your windows and doors in. You can even choose to have different colours on the inside and outside to suit the style of your property.

Alternatively, to bring out the natural beauty of the timbers you have selected for your windows and doors you could instead request that we use a deep, luxurious wood stain. The choice is yours.

Wood Options

Wood is the foundational material behind every product we sell. This is why SashLine has committed to only using timber from sustainable forests. The Forest Stewardship Council (FSC) is the body tasked with running the global forest certification system, only allowing manufacturers to display the FSC label on products containing woods where the chain of custody can be verified. At SashLine we are very proud to be one of those manufacturers.

To make your choice of wood for your window or door unit(s), either complete our Instant Quote form or call us on 0203 409 6789.

Each of our window and door units is available in five wood options, all sourced from sustainable European forests. The wood options available are as follows:

Nordic Pine

European Oak

Meranti

Accoya

Mahogany

Nordic Pine - softwood - The Nordic Pine window and door range uses modern methods of timber preservation to give this Scandinavian design the durability required for our climate.

European Oak – hardwood

Meranti – Indonesian hardwood

Accoya™ – hardwood - a modified timber that has been treated with a non-toxic acetylation process which changes the cellular structure of the timber making it extremely durable and resistant to environmental damage.

Mahogany - hardwood from Africa

Decorative Sash Horn and Beading

SashLine provides a traditional style decorative sash horn as standard with all our sash windows, and gives you the choice of two styles and several sizes of window glazing beading to customise the look of your window.

Should you wish to select a different style of sash horn for your window, other options are available on request.

Weather Seals

SashLine's windows and doors all meet stringent thermal standards.

With weather seals, double glazing and manufacturing standards of the highest order, our windows and doors, no matter which you select, are always weathertight, leak free and, most importantly, draughtproof.

Your window security

Advanced safety and security features for maximum peace of mind are an integral aspect in the design and construction of every SashLine product.

Entrance Doors

Whether you are looking for style and character or security and function, SashLine is the place to come for entrance doors for your home or development.

French Doors

Traditional French doors have never looked so good or been so affordable. SashLine manufactures Victorian, Edwardian, Georgian and contemporary style French doors for clients who are looking for an elegant addition to their home, and developers and main contractors seeking a company that can deliver on quality, volume and price.

Bifold Doors

Bifold doors add a touch of flair and enhance the value of any home. A whole wall of glass doors that slide and fold effortlessly to one side to provide a seamless transition from inside to outside, extending living spaces into garden spaces for entertaining or relaxation.

Sliding Patio Doors

Smooth-sliding patio doors manufactured and finished in our own factory to strict quality controls. SashLine produce, deliver and install patio doors for homeowners and in larger numbers for developers and contractors throughout the UK.

Our Timber doors

SashLine can produce a replica of your existing front door to renew the 'kerb appeal' of your property. We can replace an older door with a modern, durable, secure version.

Entrance Doors

Whether you are looking for style and character or security and function, SashLine is the place to come for entrance doors for your home or development.

We can replace an older door with a modern, durable, secure version. And we can manufacture entrance doors in any of 5 woods, including European Oak and Mahogany, perfectly finished with a deep wood stain or with 4 coats of paint in any colour of your choosing – all you have to do is to supply us with the RAL code.

French Door

Traditional French doors have never looked so good or been so affordable.

SashLine manufactures Victorian, Edwardian, Georgian and contemporary style French doors for clients who are looking for an elegant addition to their home, and developers and main contractors seeking a company that can deliver on quality, volume and price.

Every French door unit we produce is bespoke, manufactured to your specified dimensions, materials, ironmongery choice and colour, to conform to European health, safety, and environmental protection standards (CE marked).

Bifold Doors

Bifold doors add a touch of flair and enhance the value of any home. A whole wall of glass doors that slide and fold effortlessly to one side to provide a seamless transition from inside to outside, extending living spaces into garden spaces for entertaining or relaxation.

We know how important it is for a major design feature like a bifolding door unit to suit the character of a property so we offer all of our doors in a choice of five woods, listed in the Customising Options section below.

Every window and door manufactured by SashLine meets stringent thermal standards – weathertight, leak free and, most importantly, draughtproof.

Sliding Patio Door

Smooth-sliding patio doors manufactured and finished in our own factory to strict quality controls. SashLine produce, deliver and install patio doors for homeowners and in larger numbers for developers and contractors throughout the UK.

When we talk of wood choices and timber doors, the mind goes to the beautiful natural browns of the forest. However, while we offer stunning deep wood stains as one finishing option, we can also paint your patio doors in four weather-resistant coats under factory conditions in any RAL code colour, or colours, of your choosing for a look that will suit any home, from traditional to contemporary.

So, that's elegant sliding patio doors, manufactured to any size, finished to suit any home, glazed for insulation and fitted by our FENSA regulated team, covered by numerous guarantees. With SashLine, while you get to choose your design, quality comes as standard.

Your door security

SashLine understand the importance of feeling safe and secure in your own home, so all our doors come with a wide range of high performance security features as standard.
